

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1 1. (currently amended) An electrical connection arrangement comprising a
2 flexible multi-layer foil-like electrical conductor track element having at least one
3 connection portion electrically connected to a connection zone of an electrical
4 component, wherein walls of a housing of the electrical connection arrangement are
5 provided in the vicinity of said connection portion and said connection zone, said
6 walls being arranged such that they form, along with the electrical component, a
7 basin, said basin being open on one side only, and an originally flowable molding
8 mass is distributed in said basin such that said connection portion of the electrical
9 conductor track element and said connection zone of the electrical component are
10 completely covered by the molding mass without completely covering the entire track
11 element.

1 2. (original) The electrical connection arrangement of claim 1, wherein said
2 track element is provided with at least one additional electrical component within said
3 basin.

1

3. (Canceled)

1 4. (original) The electrical connection arrangement of claim 1 wherein said
2 track element has a bent portion within said basin.

1 5. (currently amended) The electrical connection arrangement of claim 1
2 wherein said connection arrangement is arranged within [[a]] the housing.

1

1 6. (currently amended) The electrical connection arrangement according to
2 claim 1 wherein said ~~wall-forms~~ walls form part of [[a]] the housing.

1 7. (currently amended) The electrical connection arrangement of claim 1
2 wherein said connection arrangement is arranged within [[a]] the housing having at
3 least one retaining protrusion extending through a retainer opening of said track
4 element.

1 8. (currently amended) The electrical connection arrangement of claim 1
2 wherein said connection arrangement is arranged within [[a]] the housing having at
3 least one receiving portion for receiving a part of said electrical component.

9. (canceled)

1 10. (previously presented) The electrical connection arrangement of Claim 1
2 wherein at least one layer of said track element comprises electrically conductive
3 tracks.

1 11. (previously presented) The electrical connection arrangement of Claim 1
2 wherein at least one layer is an electrically isolating layer.

12. (canceled)

1 13. (previously presented) The electrical connection arrangement of claim 1
2 wherein said electrical component has a body that forms a part of said basin.
